

Tourism Data Analysis

SQL Queries and Verified Outputs

Dataset	tourism_data(1).csv
Rows	247,284
Columns	11
SQL statements	21
Coverage	2005 to 2015

Prepared as a client-facing record of the supplied SQL analysis. All displayed outputs were generated from the supplied CSV file.

Reading the Results

The report reproduces the supplied SQL without changing its logic. Queries using COUNT(*) or COUNT(column) measure the number of dataset records. They do not total the values stored in the CSV's Count column. The query labelled Average Tourist Arrivals calculates AVG(Population), exactly as written.

Metric	Value
Total records	247,284
Countries	54
Destination states	18
Years	11
Months	12
Entry modes	4

KPI 1: Total Tourist Arrivals

```
select count(*) as total_tourist_arrival from tourism;
```

Output - 1 row

Total Tourist Arrival
247,284

KPI 2: SQL Query 2

```
-- Total Countries
select count(distinct country) as total_countries from tourism;
```

Output - 1 row

Total Countries
54

KPI 3: SQL Query 3

```
-- Total Destination States
select count(distinct state) as total_destination_state from tourism;
```

Output - 1 row

Total Destination State
18

KPI 4: SQL Query 4

```
-- Average Tourist Arrivals
select round(avg(population)) as tourist_arrivals from tourism;
```

Output - 1 row

Tourist Arrivals
79,982,749

KPI 5: SQL Query 5

```
-- Top Source Country
select country, count(country) as country_count from tourism
group by country
order by country_count desc;
```

Output - 54 rows

Country	Country Count
Other countries	22,620
Venezuela	4,524
Uruguay	4,524
United States	4,524
United Kingdom	4,524
Switzerland	4,524

KPI 6: SQL Query 6

```
-- Top Destination State
select state, count(state) as top_destination_state from tourism
group by state
order by top_destination_state desc
limit 1;
```

Output - 1 row

State	Top Destination State
Other Units of the Federation	28,188

KPI 7: SQL Query 7

```
-- Top Entry Mode
select way_in, count(*) as way_in_count from tourism
group by way_in
order by way_in_count desc
limit 1;
```

Output - 1 row

Way In	Way In Count
Air	101,064

KPI 8: SQL Query 8

```
-- Peak Month
select month, count(month) as month_count from tourism
group by month
order by month_count desc
;
```

Output - 12 rows

Month	Month Count
September	20,607
October	20,607
November	20,607
May	20,607
March	20,607
June	20,607
July	20,607

Month	Month Count
January	20,607
February	20,607
December	20,607
August	20,607
April	20,607

KPI 9: SQL Query 9

```
-- • Show arrivals by month or season using a column chart.
select seasons, count(seasons) from tourism
group by seasons;
```

Output - 4 rows

Seasons	Count(Seasons)
Fall	61,821
Spring	61,821
Summer	61,821
Winter	61,821

Business Analysis 1: SQL Query 10

```
-- Business Analysis Questions
-- 1. What is the total number of tourist arrivals in the complete dataset?
select count(*) as total_tourist_arrival from tourism;
```

Output - 1 row

Total Tourist Arrival
247,284

Business Analysis 2: SQL Query 11

```
-- 2. Which 5 countries contribute the highest number of tourist arrivals?
select country, count(state) as highest_number_of_tourist_arrivals from tourism
group by country
order by highest_number_of_tourist_arrivals desc
limit 5;
```

Output - 5 rows

Country	Highest Number Of Tourist Arrivals
Other countries	22,620
Venezuela	4,524
Uruguay	4,524
United States	4,524
United Kingdom	4,524

Business Analysis 3: SQL Query 12

```
-- 3. Which continents contribute the most tourist arrivals?
select continent, count(state) as highest_number_of_tourist_arrivals from tourism
group by continent
order by highest_number_of_tourist_arrivals desc
limit 1;
```

Output - 1 row

Continent	Highest Number Of Tourist Arrivals
Europe	93,468

Business Analysis 4: SQL Query 13

```
-- 4. Which 5 destination states receive the highest number of tourists?
select state, count(state) as highest_number_of_tourist_arrivals from tourism
group by state
order by highest_number_of_tourist_arrivals desc
limit 5;
```

Output - 5 rows

State	Highest Number Of Tourist Arrivals
Other Units of the Federation	28,188
Rio Grande do Sul	27,528
Paraná	24,228

State	Highest Number Of Tourist Arrivals
Santa Catarina	21,636
São Paulo	14,424

Business Analysis 5: SQL Query 14

```
-- 5. Which entry mode (Air, Land, River, or Sea) is used the most by tourists?
select way_in, count(*) as highest_number_of_tourist_arrivals from tourism
group by way_in
order by highest_number_of_tourist_arrivals desc;
```

Output - 4 rows

Way In	Highest Number Of Tourist Arrivals
Air	101,064
Sea	67,500
Land	46,572
River	32,148

Business Analysis 6: SQL Query 15

```
-- 6. Which month records the highest tourist arrivals?
select month, count(*) as highest_number_of_tourist_arrivals from tourism
group by month
order by highest_number_of_tourist_arrivals desc
limit 1;
```

Output - 1 row

Month	Highest Number Of Tourist Arrivals
September	20,607

Business Analysis 7: SQL Query 16

```
-- 7. Which season has the highest tourist arrivals?  
select seasons, count(*) as highest_number_of_tourist_arrivals from tourism  
group by seasons  
order by highest_number_of_tourist_arrivals desc  
limit 1;
```

Output - 1 row

Seasons	Highest Number Of Tourist Arrivals
Winter	61,821

Business Analysis 8: SQL Query 17

```
-- 8. How have total tourist arrivals changed year by year?  
select year, count(*) as total_tourist_arrivals from tourism  
group by year;
```

Output - 11 rows

Year	Total Tourist Arrivals
2,005	20,352
2,006	20,352
2,007	21,120
2,008	22,440
2,009	21,780
2,010	21,780
2,011	21,780
2,012	22,440
2,013	20,460
2,014	27,060
2,015	27,720

Business Analysis 9: SQL Query 18

```
-- 9. Which year recorded the highest tourist arrivals and which year recorded the lowest?
select year, count(*) as total_tourist_arrivals from tourism
group by year
order by total_tourist_arrivals;
```

Output - 11 rows

Year	Total Tourist Arrivals
2,005	20,352
2,006	20,352
2,013	20,460
2,007	21,120
2,009	21,780
2,010	21,780
2,011	21,780
2,008	22,440
2,012	22,440
2,014	27,060
2,015	27,720

Business Analysis 10: SQL Query 19

```
-- 10. For each year, which country contributed the highest number of tourists?
select year, country, count(*) as total_tourist_arrivals from tourism
group by year, country
order by total_tourist_arrivals desc
limit 1;
```

Output - 1 row

Year	Country	Total Tourist Arrivals
2,015	Other countries	2,520

Business Analysis 11: SQL Query 20

```
-- 11. What are the tourist arrival trends across the 12 months?
select month, count(*) as total_tourist_arrivals from tourism
group by month;
```

Output - 12 rows

Month	Total Tourist Arrivals
April	20,607
August	20,607
December	20,607
February	20,607
January	20,607
July	20,607
June	20,607
March	20,607
May	20,607
November	20,607
October	20,607
September	20,607

Business Analysis 12: SQL Query 21

```
-- 12. How do tourist arrivals differ by entry mode across the different destination states?
select state, way_in, count(*) as total_tourist_arrivals from tourism
group by state, way_in;
```

Output - 45 rows

State	Way In	Total Tourist Arrivals
Acre	Air	660
Acre	Land	1,320
Acre	River	1,320
Amapá	Air	1,320
